

Exchange Students/Programs

The Kimball Public Schools recognize the value to be derived for students resulting from interacting with those of other countries and cultures.

Therefore, the Kimball Public Schools will accept exchange students based upon financial and class size considerations from reputable and approved Exchange Programs to be enrolled. Reputable programs shall be determined by the building principal upon his/her knowledge or appropriate research. Foreign Exchange students enrolled in the Kimball Public Schools may receive a regular high school diploma if they meet the requirements as set forth by the Kimball Public Schools Board of Education for graduation. Those Foreign Exchange students, who do not meet the graduation requirements as set forth by the Board, shall receive a "Certificate of Achievement".

The Kimball Public Schools will also offer resident students the opportunity to participate in Exchange Programs should they voluntarily choose to do so. Opportunity shall mean working cooperatively with the student and his/her parent/guardian regarding issues related to credits and graduation as may become important considerations, and with the selection of a program from a reputable exchange program.

District funds shall not be provided in any direct manner to Exchange students, either those received or those attending. However, the district will cooperate with appropriate fund-raising activities to support exchange programs/students.
