STUDENT HEALTH AND IMMUNIZATION CHECKUPS

Physical examinations for kindergarten (beginning grade) and seventh grade students, and proof of immunizations, are legal requirements.

Students enrolling in kindergarten (or the beginning grade) and students entering the seventh grade in the school district shall have a physical examination by a licensed physician and provide proof of such an examination to the school district. A physical examination and proof of such an examination shall be required by the administration for students in other grades transferring to the school district from out of state.

A certificate of health stating the results of a physical examination and signed by the physician, assistant physician or registered nurse shall be on file at the attendance center.

Students enrolling in the school district shall also submit proof of immunization against measles, mumps, rubella, poliomyelitis, diphtheria, pertussis, and tetanus. In addition, hepatitis B is required by law. The student may be admitted conditionally to the attendance center if the student has not yet completed the immunization process but is in the process of doing so. Failure to meet the immunization requirement will be grounds for suspension, expulsion or denial of admission.

Exemptions or temporary waivers from the immunization requirement in this policy will be allowed only for medical, military or religious reasons recognized under the law.

Health Inspections

The school district shall cause every child under its jurisdiction to be separately and carefully inspected, except as otherwise provided by law, to ascertain if such a child is suffering from (1) defective sight or hearing, (2) dental defects, or (3) other conditions as prescribed by the Department of Health and Human Services ("Department"). Such inspections shall be conducted on a schedule prescribed by the Department and shall be based on current medical and public health practice. In lieu of conducting the inspections, the school board may employ regularly licensed physicians to make such inspections.

If such inspection determines that any child has defective sight or hearing, dental defects, or other condition for which screening is required, the school shall notify the parent of the child in writing of such condition and explain to the parent the necessity of professional attendance for such child.

Whenever a child apparently shows symptoms of any contagious or infectious disease, such child shall be sent home immediately or as soon as safe and proper conveyance can be found. The administration and the school board shall be notified if there is concern of an outbreak. Such student may be excluded from school as provided in the Student Discipline Act.

A child shall not be required to submit to an inspection required by this policy if his or her parent or guardian provides school authorities with a statement signed by a physician, a physician

assistant, or an advanced practice registered nurse practicing under and in accordance with his or her respective credentialing act or other qualified provider as identified by the Department's applicable rules and regulations, stating that such child has undergone such required inspection within the past six months. A child shall submit to any required inspection for which such a statement is not received.
