

Use of School Computers

The School District approves the use of school computers for personal reasons by staff for personal email, developing familiarity with various software programs, and internet use during non-educational times. Non-educational times are before or after classes begin, during designated lunch hour, or during designated planning times.

The reason for permitting personal use during these specified times is to encourage staff training, understanding, and development in the utilization of computers which can be shared in an educational manner with students.

School computers will not be used to campaign for or against the election of a candidate or to support or oppose a ballot question nor may they be used in conducting personal business enterprises.
