

Food Service Program

The Kimball Public Schools participates in the National School Lunch Program. Both a breakfast and a lunch program are provided at Mary Lynch Elementary and The Junior/Senior High School locations.

The Food Service program is intended to offer wholesome, well-balanced meals which comply with the guidelines set forth by Federal Government (US Department of Agriculture through Food and Nutrition Service) and State Government (Nebraska Department of Education through Nutrition Services).

The Board of Education shall set the price for meals offered in the program, and shall annually review meal prices. The program's goal is to be a self-sufficient program.

The program shall have a Food Service Director recruited and hired by the Superintendent of Schools, and will work directly under the Superintendent of Schools. The director of the program shall have the responsibility to recommend staffing and personnel and oversee the total operation of the program to make certain that all guidelines are met.

The Food Service Director shall meet and confer with the building principals and the Superintendent of Schools on a regular basis to plan and ascertain that the program is meeting overall school goals and objectives.
